

International Summer School of the **Faculty
of Transport and the Faculty of Mechanical
and Industrial Engineering**

**Modeling
and improvement
of processes
in supply chains**

Modeling and improvement of processes in supply chains

During the classes issues related to modeling and improving processes in supply chains will be discussed in detail. These are topics related to the profile of the faculties' activities. A large part of the courses will be the practical part devoted to working with specialized software. In addition, there will be series of lectures, exercises and workshops allowing the application of the acquired knowledge in a practical way. In addition to issues related to the area of technical sciences, a five-hour block of classes has been planned to promote Polish culture, referring to the profile of activities of the Faculties in order to ensure the coherence of the entire Programme.

[Apply](#)
